LAUNCH IN 2018

The degree is focused on the universality of the design method and its application to products, spaces, graphics, services and brands, both in the real and virtual world.

The main innovation lies in the coverage of the full cycle of a design project: from ethnography, trend studies, construction of future scenarios and tools for the diagnosis of opportunities; to formulation of viable projects, traditional tools of design formalization, the industrial system and user studies.
45% of undergraduate students receive some type of scholarship or financial assistance.
